Experience

Freelancer
Full Stack Web Developer

Brazil
03/2025 - Present

- Responsible for creating front-end interfaces using ReactJS and integrating with back-end services using Node.js.
- Deploy applications on VPS and traditional VMs to ensure continuous service availability.
- Manage both structured and unstructured data using PostgreSQL and MongoDB.
- Maintain source code, perform code reviews, and contribute to workflows through Git and GitHub

Education

Pontificia University of Minas Gerais - PUC
Bachelor's Degree in Information Systems

Minas Gerais, BR
01/2025 - Present

Projects

Personal Portfolio

Developed a responsive portfolio website to showcase my skills and projects. This project was built using React with TypeScript. Key features include a clean and modular codebase and a responsive design optimized for both mobile and desktop experiences.
Project repository available at https://github.com/tiago0214/tiago-portfolio.

Beauty Company Web Page

A web commerce platform that lists beauty products with functions to add to cart, favorite products, and remove them as well. All product information is stored in a database and is served by a backend application developed in Node.js.
Project repository available at https://github.com/tiago0214/beauty-company-project

Coffee Delivery Web Application

Developed a responsive e-commerce platform for a coffee shop, enabling users to browse products, add items to a shopping cart, and complete orders seamlessly.
Project repository available at https://github.com/tiago0214/coffee-delivery

Login Page Application

A full-stack user authentication project that demonstrates the creation of a modern login page. The project is split into a frontend and backend, showcasing a integration between client and server.
Project repository available at https://github.com/tiago0214/login-page
